

SOLUTIONS FOR
**PERSONAL &
HOME CARE**

**Flexible material converting
and printing services**

Extend your capabilities Expand your reach.

Prominent packaged goods and packaging companies rely on our large-format flexible material converting and printing services to help lower their costs and deliver the speed-to-market advantage they need. What about you? We're eager to earn your business and your trust.

Web Industries can supplement your existing capabilities by helping you add color or functionality to capture new customers. Our multi-color flexographic presses offer the option of using water- or solvent-based inks and provide limitless design opportunities for printing on nonwovens, packaging, films, and other substrates. Web can also apply specialized inks for customized performance.

What can we do for you?

Printing Services

8-color W&H flexographic printing

- Max 62" print width / 64" incoming material width
- Max OD = 50"
- 100% full width vision inspection
- Water- or solvent-based inks
- Ability to add functional inks
- Fast turnaround lead times

1-color water-based flexographic printing

- Max 92" print width / 93" incoming material width
- Max OD = 72" incoming / 49" outgoing
- Can be combined with in-line precision registered slitting
- Ask us about our functional printing capabilities

Precision Converting Services

Slitting, spooling, and sheeting

- Unmatched slitting and spooling capacity under one roof
- Spooled materials support higher manufacturing productivity than individual pad rolls
- Add value and efficiency to your processes, reducing overall costs
- Slit and spool from as narrow as 1mm up to your maximum requirement
- In-house ultrasonic bonding and hot-melt lamination
- Co-located services help speed new products to market

We are not a competitor. **We are your partner.**

Our goal is to partner with innovative companies and get their products into the marketplace ahead of the competition. Our approach is simple. We develop close, collaborative relationships with customers. We listen to their needs. We share what we've learned from our years in the business. We innovate and we deliver. We see ourselves as partners, not just suppliers.

Call us for a proposal. And ask about our special offer for new customers.
